

BUILDING CANVAS

Building Canvas is a unified, AI-powered platform that digitizes and automates the entire lifecycle of intelligent building systems – from design to deployment to operation.

Key Features for Partners:

- Gives you back time – less time spent on repetitive tasks for designing and building your BMS
- Provides a programming interface with virtual device management in the cloud
- AI powered device creation and configuration
- Generate a Digital Twin (Semantic Data Model) as the single source of truth, as-you-go
- Automatic virtual device start up, as you need them, with no limit on concurrent devices

Will roll out to other Delta IBT products over time!

How to stay in the know:
